Summary

Frontend developer with 12+ years of experience building scalable, high-performance web applications using React, Angular, and JavaScript (ES6+), Redux Toolkit, CI/CD pipelines, and delivering multilingual e-commerce applications integrated with SAP Commerce Cloud. Strong focus on performance, accessibility, and modern architecture.

Key Skills

Frontend: Angular 19, React.js, TypeScript, JavaScript (ES6+)

Styling: Tailwind CSS, SCSS, HTML5, CSS3, Accessibility (WCAG 2.1)

Tools: GitHub Actions, Jenkins, Azure DevOps, Docker, AWS ECS/EKS, Webpack, VS Code, GitHub Copilot, ChatGPT

Testing: Jest, Jasmine, Karma, Playwright

Architecture: Microfrontend, SPA, Responsive UI

Methodologies: Agile / Scrum

Professional Experience

Senior Software Engineer II – Frontend

Trelleborg Sealing Solutions India Pvt. Ltd. | Apr 2018 – Present

- Solely developed and modernized the complete Seals-Shop.com e-commerce platform, migrating it from legacy JSP pages to a decoupled, responsive web application using Angular 12, TypeScript, JavaScript (ES6), HTML5, CSS3, and Bootstrap.
- Implemented state management using NgRx and RxJS for scalable, reactive, and maintainable UI handling.
- Designed and developed core business modules — Login/Register, Account Management, Checkout, Order, Cart, Promotions, and Payment Integration — ensuring secure workflows and optimized UX.
- Integrated frontend with RESTful APIs from SAP Commerce Cloud (Hybris), Oracle ATG, and Endeca / Oracle Commerce Cloud for content delivery, product data, and order management.

- Delivered multilingual and multi-region support (English, German, French, Spanish, Italian) with WCAG 2.1 accessibility compliance.
- Implemented Server-Side Rendering (SSR) and integrated Google Analytics / Google Tag Manager (GTM) for enhanced SEO tracking, page performance, and analytics visibility across regions.
- Contributed to CI/CD pipelines using Jenkins and Docker, enabling automated build and deployment workflows.
- Actively participated in Agile delivery, code reviews, and automated testing using Jasmine, Karma, and Playwright.

Frontend Developer / Software Engineer

Wipro, Cognizant, Neev Technologies, Nexwave Talent Management | 2012 – 2018

- Developed scalable frontend modules for telecom, social, and enterprise clients including Ericsson, LinkedIn, Maersk Drilling, and SAP.
- At Wipro (Ericsson project) – built and optimized telecom management UIs using JSCore framework, improving performance and usability.
- At Cognizant (LinkedIn project) – contributed to React-based UI components, ensuring responsive layouts and modular design.
- At Nexwave – developed Maersk Drilling hybrid mobile apps for Android/iOS using jQuery Mobile.
- At Neev Technologies – delivered SAP Fiori applications with HTML5, CSS3, and JavaScript, enhancing user workflows and responsiveness.
- Improved UI performance, code maintainability, and component reusability across large-scale applications.

Education

Bachelor of Engineering (Information Science & Engineering)
Visvesvaraya Technological University

Achievements

- Delivered multilingual e-commerce platform across 5 European regions.
- Recognized for innovation in UI performance optimization (2023).
- Mentored frontend developers in Angular, React, Redux Toolkit, and automated testing practices.
